Microblading	R2200

Microblading is a semi-permanent technique where hair is drawn one by one to mimic real hair. When done correctly, it's the most natural brow enhancement technique. We work with the latest technology, organic pigments and highly effective anaesthetics to make the appointment comfortable, achieving results that we are proud of as an artist and brows you will love.

**HAIR REMOVAL**

Sugar epilation, a formula of 100% natural ingredients (sugar, water, and lemon) is a beautiful method alternative to waxing, and is one of our specialties. This highly effective ancient organic technique is the gentlest type of hair removal for the skin, increases skin and hair softness, and reduces hair growth. Ideal for intimate hair removal.
